

FAVOUR ODION

DTC MARKETING MANAGER | LIFECYCLE & GROWTH SYSTEMS

Lagos, Nigeria | Odionfavor0@gmail.com | +2349118027204 | [LinkedIn](#)

I have over 3 years of experience in email marketing, lifecycle systems, and marketing operations across DTC and e-commerce brands. I build and manage full retention systems, from Klaviyo flows and segmentation to CRM operations, automation, and team workflows. Some of my results include 57.9% open rates on a cold re-engagement campaign, \$15,000 in orders from a single welcome flow, and a £3,500 booking tracked directly from an email campaign. I work well in fast-paced environments and I take full ownership of what I build.

WORK EXPERIENCE

Email Marketing Operational specialist Instago Ed Travels (Part-time) Jan 2026 – Present

- Built and ran a 5-email re-engagement campaign for 15,000 cold subscribers, split into 4 segments based on intent. The first email got a 57.9% open rate and the final urgency email reached 87% open rate with 10% CTR
- The campaign directly led to a £3,500 client booking, tracked from the first email click to the signed invoice
- Built and deployed a branded payment gateway on GitHub and linked it inside email campaigns so clients could pay directly without any third-party issues
- Used Google Apps Script to automate payment data collection into a CRM spreadsheet, with automatic confirmation emails sent to clients when payment was received and when status changed to paid

Email Marketing Specialist | Kings (Men's Fashion E-commerce) Dec 2024 - Feb 2025

- Built a 5-step welcome flow that moved new subscribers toward their first purchase. It got 40% open rate, 20% CTR, and 20% conversion rate, bringing in around \$15,000 in orders
- Used GA4 to find where customers were dropping off, then built cart recovery and post-purchase flows to bring them back and recover lost orders
- Set up interactive pop-up quizzes to capture and segment leads, which turned over 25% of visitors into first-time buyers and increased cross-sell and upsell revenue by 15%
- Ran a structured A/B testing plan across different lifecycle stages to find and fix gaps in activation, monetization, and retention

Marketing Operations & Executive Assistant Mar 2025 - MAY 2025

- Handled all CEO communications across Slack, LinkedIn, and email. Kept a 95% same-day response rate with no missed follow-ups
- Built automated onboarding workflows connected to the CRM, which cut manual admin work by 40% and made team handoffs much cleaner
- Set up and maintained project tracking in Notion and Google Workspace so the team always knew what was happening and what needed to move
- Coordinated client campaigns from planning to deployment, managing timelines and approvals across the team

SKILLS
