WORK EXPERIENCE

Executive Assistant | Remote [Generalgiist]

Aug 2025 - march 2026

- Managed CEO and client communications, including scheduling meetings, coordinating travel, and handling documentation.
- Designed and implemented automated onboarding workflows with CRM integration, reducing manual administrative effort by 40% and enabling clean handoff to the HR team
- Executed multi-client email campaigns and maintained project tracking systems in Notion and Google Workspace, improving workflow consistency and execution speed across the startup
- Documented SOPs for recurring workflows, ensuring tasks could be picked up and repeated accurately without additional briefing
- Executed multichannel client campaigns and streamlined project tracking systems, improving workflow consistency and execution speed across the startup.

AI-Assisted Marketing & Automation Specialist | AURAFLAMES

Mar 2024 - MAY 2025

Multi-Client Lifecycle Strategy Flow & Automation

- Managed and scheduled social media posts using Buffer, matching client-approved visuals to content, confirming accurate scheduling, and ensuring every post went live on time across platforms
- Built multi-step automated workflows in n8n to connect platforms, trigger actions based on user behaviour, and eliminate manual steps from recurring operations, reducing task handling time significantly
- Used Claude daily for Liquid syntax, code debugging, and workflow logic, testing, and fixing code faster without relying on external support
- Rebuilt abandoned cart pipelines using conditional logic and trigger-based sequencing, increasing recovery rate by 12% and documenting updated SOPs for future team use
- Monitored campaign and flow performance daily using GA4, diagnosing bottlenecks and optimising touchpoints to reduce revenue drop-off and improve engagement

CRM Operations Specialist | VitalGlow — Wellness Supplements

Nov 2023- January 2024

- Managed high-volume support and CRM operations across HubSpot and Zendesk, handling email and SMS workflows while keeping ticket statuses and records accurate in real time
- Built AI-driven automations to categorise incoming tickets, streamline responses, and reduce manual handling, maintaining QA above 90% and CSAT at 4.5/5
- Monitored pipeline performance daily, fixing drop-off points and updating workflows, increasing repeat purchases within 30 days by 26%
